SUMMARY

- Junior Data Analyst Specializing in data analysis, business intelligence, and visualization.
- Open to Learning and a very Quick Learner
- Able to work collaboratively with cross-functional teams and effectively communicate

EDUCATION

Makerere University

Bachelor of Science in Computer Science

2024 – 2027

Kampala, Uganda

WorldQuant University

Data Science Lab

Dec 2025 – Present

Online

PROJECTS

Algomind Hive – Predictive Analytics Project

<https://algomindhive.onrender.com>

Tools: Python, Pandas, SQL, Django, scikit-learn

- Processed and integrated climate, hive, and market data to generate analytical insights
- Analyzed climate, hive, and market data to predict honey yield, colony health risks, and optimal selling periods

Sales Performance Dashboard

Tools: Microsoft Excel

- Processed and modeled multi-source sales data to create an interactive, real-time performance dashboard
- Visualized sales KPIs, trends, and comparisons with filtering and drill-down analysis by region, product, and date

TECHNICAL SKILLS

Languages: Python | SQL

Libraries and Frameworks: Django | Pandas | Numpy | Matplotlib | Scikit-Learn

Databases: MySQL

Tools: Excel | Power BI | Git | GitHub

Focus: Data Wrangling, Cleaning and Modeling; Analysis and Visualization of Data

CERTIFICATES

Data Science and Analytics

HP Life

Issued: Dec 2025

Business Analysis Basics

Simplilearn

Issued: Jan 2026

Artificial Intelligence for Business

Simplilearn

Issued: Sep 2025
